# The Bed Desk

"Making Your Life Easier"

The Bed Desk folds out into 5 Main positions and has over 21+ uses. In **Position #1** you can use it as a Book-stand, Music Stand, Artist's Easel, Cookbook Holder, and it's great with a fully open newspaper (see video).

The little front Ledge helps hold the pages down and reading material open. The Lid helps support objects and is adjustable like the Ledge from 0-90 degrees.

The **Brass Clip** helps hold the binder of the

book firmly to the Lid kind of like a big paper-clip. The clip also fits over both legs to lock them in place when traveling and transporting The Bed Desk.

In **Position #4** laptop computers should rest on the Lid. By lining up the Lid, Ledge, Laptop, and wrists ergonomics can be achieved by adjusting all the parts to parallel angles. These angles will differ for every person

according to their size. The angle is adjusted by the T-knob located on the right side. A half-turn loosens and tightens allowing adjustment. The silver rear wood insert is highly suggested for items up to 17 lbs. The Legs are 21" wide and **"Great for Recliners!"** This position is also ideal for writing and the work surface can be expanded with the help of a simple art board found at Art/Home stores (see video). This position is also ideal for watercolor painting, drawing, sketching etc. and being used as a portable lectern for public speaking.

When the lid is open **The Pen Hole** can be found behind the rear wood insert. When the Lid is closed the Lid Support can hide a pen, pencil, paint brush, eye liner, etc.

In **Position #3** the Lid can go flat while the Ledge stays up and a snack, meal, or work surface can be enjoyed. The Ledge hangs over by an 1/8" to help ladies with long nails and people with special needs. In an upright position the Ledge can help plates, bowls, small items, craft supplies, etc. stay in place without falling over.

In **Position #2** the legs fold underneath so it will sit flat & flush on any surface and can be used on a desk, table, nightstand, or person's lap to hold books, clip-on lights,

sheet music, magazines, a keyboard, cards, letters, bills, canvas, crafts, mirrors, brochures, make-up, mail, etc.

In **Position #1** it all folds up into a little briefcase that's about 2" thin and weighs a little more than 6 lbs. Set-up and take-down takes a couple seconds and you're on your way.

You can eat, read, write, type, paint, draw, craft on couch, table, sofa, loveseat, recliner, plane, or train. **Great for small places, road trips, students, teachers, professionals, salespeople, crafters, painters, public-speakers, campers, seniors, RVers, displaying books/collectables, special occasions, and the list goes on.** Makes a great gift because it's like hundreds of products all-in-one!

## Guaranteed for a Lifetime!

Each desk is hand crafted with imported Baltic Birch (7 and 13 Ply) because it's beautiful, sturdy, and timeless. It will last 2 Lifetimes or more! The leather handle is 8-10 oz. leather and embossed with the Layd-Back company name and logo. The Brass Clip is solid brass that's cut, polished, bent, and shaped all by hand. The Bed Desk comes with a **Lifetime Guarantee** and is sure to be an heirloom the whole family will appreciate. Please tell a friend and "May you always be Layd-Back!"
